

RealView Pharmacy Insights Program

Data-informed pharmacy benefit insights, personalized for your plan.

PBDRx's *RealView* Pharmacy Insight Program is a value-added program from PBDRx designed to empower our clients to make smarter, more strategic pharmacy benefit decisions.

Guided by our trusted Account Management team, receive attentive support coupled with proactive, actionable insights and recommendations. The features outlined below are provided by request, at the cadence and depth that you prefer. To ensure our partnership is aligned, efficient, and impactful, **we put you in control of how and when we engage in your hands.**

Plan Performance Snapshot

Actionable data to help shape your overall benefit strategy:

Year-over-year benchmarking and trend analysis

- High-cost claimant identification and insights
- Clinical edit outcomes

Annual, Quarterly, and Monthly Reviews

Strategic analysis and targeted reporting on plan spend and utilization to increase visibility and inform data-driven decisions associated with the following programs:

- **Specialty Pharmacy Savings:** Formulary optimization, utilization and member data, savings strategies, generic and biosimilar conversion opportunities, and savings achieved
- **Utilization Management Reviews:** Impact and outcomes of our suite of utilization management protocols including prior authorizations, step therapy, maximum dose restrictions, prescriber specialty, and quantity controls
- **GLP-1 Utilization Insights:** Review of GLP-1 use for diabetes and weight loss to continuously evaluate current and future strategy with evolving clinical data
