Preventative Drug List  
by Therapy Class

---

Effective January 1, 2024  
Last updated October 1, 2024

# We're Pharmacy Benefit Dimensions and we're focused on you.

Pharmacy Benefit Dimensions has designed a Preventative Drug List, which is a list of medications for chronic conditions that have the deductible requirement waived. As a result, there is limited or no cost to you as a member (based on your plan of benefits). We know that controlling healthcare costs is important to you however, we do not want medication costs to be a deterrent to good health. In addition, if you or a dependent in your plan have met your deductible, these medications will pay as your plan benefit specifies.

NOTE: The benefit applies to select plans that provide the Preventative List as an additional benefit. This list is subject to change and does not indicate coverage. Please check your benefit materials for the specific drugs covered and the copayment information for your prescription drug benefit program. This list does not include all conditions that may be prevented with preventative prescription drugs or all preventative drugs available.
